- a 0.20 mm nylon line; a thin needle;
scissors; glue for non-absorbent materials

Difficulty: ●●●●●

Procedure:

Step 1:
String 12x R. Tie them together.
Leave about 20 cm of the shorter end sticking out. You will use it to string the PB 4.

Step 2:
Sew 3x R to every other R. This will create six projections.

Step 3:
Sew 5x R to the tops of the projections.

Step 4:
Sew 7x R to the tops of the projections.

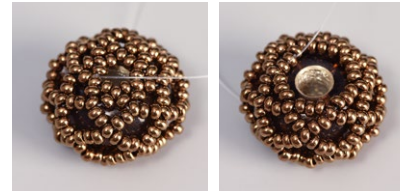

Step 5:
Sew 7x R to the central R.

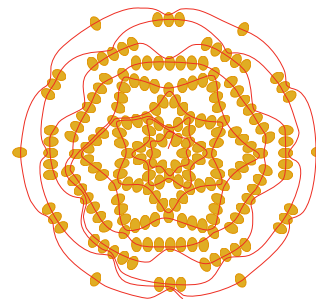

Step 6:
Sew 5x R to the central R. Place the PB1 in the net before tightening it.

Step 7:
Sew 3x R to the central R.

Step 8:
Sew 1x R to the central R. Sew the line in. Create knots between the R in the diagonal sections of the projections.

Step 9:
Return to the beginning. Sew on the PB4. String it on the line. Secure the line in the adjacent slit between the R. Thread the line through the PB4 one more time. Sew it in.

Step 10:
Glue the praline to the base of the ring. Leave it to dry.
