- a 7 cm eye pin; 6 mm and 8 mm rings;
a fastening ring or large carabiner

- a 0.20 mm nylon line; scissors; pliers with conical points

Difficulty: ■■■■■

Procedure:

Step 1:
Thread about 30 cm of line with 11x **Th**. Thread the line through it one more time. Tie off three knots. Cut off the line about 2 mm from the knot. Do not thread the end of the line into the **Th**.
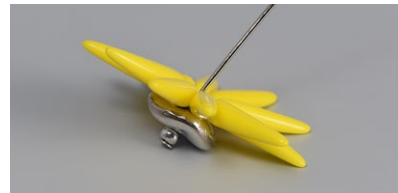

Step 2:
String all seven shades of the **Th** like this.

Step 3:
First string 1x **R**, 1x **Ri** and 1x **F** onto an eye pin. Then string the yellow **Th**. Press the **F** into the centre of the **Th**.

Step 4:
Continue by repeating the procedure, i.e. 1x **Ri**, 1x **F** and the next **Th** shade. At the end, string 1x **Ri**.

Step 5:
Grasp the end of the pin between the points of the pliers. Twist it around the point of the pliers. You can even create a double loop depending on the size of the pin.

Step 6:
String a 6mm ring onto the loops on the eye pin. Connect 2x 8mm rings to the 6mm ring. Then string a fastening ring through them or you can connect a carabiner.
