

Step 11  
Thread the larger loop over your foot with the elastic on your heel. Pull the smaller loop over your big toe.

ACCESSORY MADE WITH THE PRECIOSA CORNELIAN STAR

# Foot adornment

**PRECIOSA**

# Foot adornment

*Create an exceptional accessory with PRECIOSA Cornelian Star seed beads for relaxing summer moments, wandering in the grass or walking along a beach. You are sure to appreciate the playful line of the shadows occurring at the points of the white stars covered in transparent glass.*

## Materials and tools:

PRECIOSA Cornelian Star (KH)  
311 69 001; 31;  
63715 turquoise; 48x (KH1)

311 69 001; 5/0;  
63715 turquoise; 48x (KH2)

- metal end pieces for cords with  
a threading diameter of 3,5 mm  
(diameter 8 x 15 mm)

- an ordinary 0.30 mm grey wire;  
round elastic with a 2 mm diameter;  
skewers; snipping pliers; scissors; a ruler

Difficulty: ●●●●●

Technique: stringing

## Procedure:

Step 1  
Cut off around 1.20 m of wire.  
String about 11,5 cm of KH2  
(about 19 beads) into the centre of the wire.  
String 4x KH1 onto both ends of the wire.

Step 2  
String 1x KH2, 10x KH1 and 1x KH2 onto  
each end of the wire.

Step 3  
Thread the wired back through 1x KH2  
and 10x KH1. The wire will create loops  
on the end of each arm of KH.

Step 4  
String 1x KH2 in the middle, between  
the arms of KH and string 1x KH2 onto  
both strands of wire. Thread the strands  
of wire against one another.  
Continue threading the wire through  
the 10x KH1 and 1x KH2 on the arms.

**Step 5**  
Insert the skewers into the loops at the end of the arms. Tighten the wire by pulling on the ends of the individual strands.

**Step 6**  
Create another loop around the skewer. Once again thread the wire through 1x **KH2** and 10x **KH1** on the arms towards the middle. Tighten.

**Step 7**  
Once again thread the wire through 1x **KH2** and 4x **KH1** towards the loop of **KH2** on one of the strands (possibly the longest). Also thread it through all the **KH2** in the loop. Thread it again through 2x **KH1** in the direction towards the centre. Thread the wire through 1x **KH2** and 2x **KH1** on the second arm towards the loop of **KH2**. Tie off the ends of the wire with three knots. Thread the ends of the wire through 2x **KH1** and snip them off.

**Step 8**  
Prepare 40 cm of freshly cut elastic and 2x end pieces. Carefully remove the skewer. Thread one end of the elastic through the loops on one arm. String the end pieces onto the other end of the elastic with the narrower openings facing each other. Thread the end of the elastic through the loops on the wire and on the second arm.

**Step 9**  
Tie two knots at the loops. They should be sufficiently big so that the end pieces remain in place. In the example, the knots are placed about 18 cm from one another. Adapt the distance to the size of your foot. The first knot is a double knot. Twist the elastic into a circle and thread the end through the circle twice. Tighten. The second knot is a simple one. Tie it and tighten.

**Step 10**  
Cut off the end of the elastic about 5 - 8 mm from the knots. Hide the knots in the end pieces.
