- a gallery wire (it is possible to snip off the necessary length) or a guide with the appropriate number of eyes and a mutual spacing of 4 mm between the eyes; 5 mm and 8 mm rings; a carabiner; a medium-sized chain; a 16 mm eye pin; earring hooks

- a 0.20 mm nylon line; a thin needle; scissors; snipping pliers; needle-nose pliers; flat-nose pliers; a ruler

Difficulty: ●●●●

Technique: stringing, linking

Procedure:

The three-row oval

Step 1:

Cut the gallery wire to the required lengths.

Step 2:

String 4x FPB4, the first eye of the short guide, 4x FPB4, leave the last three eyes on the long guide free and string the fourth, 4x FPB4, the first eye of the next short guide, 4x FPB4 and the eye next to the central one on a long guide. Thread the line through everything one more time. Tie three knots. Pull the ends into the beads.

Step 3:

String the second row. String 5x FPB4 between the guides. String another 1x R on each side of the short guides. Thread the line through them one more time. Sew it in.

Step 4:

String the third row. String 7x FPB4 between the guides. Thread the line through them one more time. Sew it in.

The set of the necklace and the earrings

You will need a guide with nine eyes and 2x guides with four eyes for the oval. After stringing the rows, use an eye pin to link 1x FPB8 onto the last eye of the short guide. Grasp the end of the wire between the points of the needle-nose pliers and twist it about them. Slightly open the created loop and hang it on the eye. Close it again.

Hang an earring hook on the opposite guide using a 5 mm ring for the earrings.

You need 55 cm of chain for the necklace. Use a 5 mm ring to connect a carabiner to one end. Attach the chain to an oval at the opposite end using an 8 mm ring.

The necklace with three ovals

One oval requires a guide with eleven eyes and 2x guides with three. String the ovals. Connect them together using 5 mm rings. Hang 1x FPB8 on the outer oval. Attach the 55 cm of chain with the carabiner to the other outer oval.
