SET MADE FROM PRECIOSA FARFALLE SEED BEADS

# Autumn mood

PRECIOSA

# Autumn mood

Adorn yourself with a necklace consisting of pendants made from PRECIOSA Farfalle seed beads in various shades of purple. This necklace is sure to go with the costume of any fan of fast approaching Halloween. The autumn tones of the seed beads blend with the steel-colored chain, which goes well with everyday and evening wear.

## Materials and tools:

PRECIOSA Farfalle  
321 93 001; 3.2 x 6.5 mm;  
20060 purple matt (F1)

321 90 001; 2 x 4 mm;  
20060 purple (F2)

321 90 001; 2 x 4 mm;  
01623 neon purple (F3)

- a chain with large links (10 links - 8.5 cm);  
eye pins (7 cm - 13x, 6 cm - 14x, 5 cm - 14x);  
6 mm rings (39x); a 5 mm ring  
(the necklace); 4 mm rings (2x - earring);  
a 22 mm carabiner; earring hooks

- needle-nose pliers or pliers with rounded points (the loops on the eye pins);  
flat-nose pliers (2x - closing the rings,  
straightening the eye pins, opening  
the chain links); combination pliers  
(2x - in the case of a strong chain); a ruler

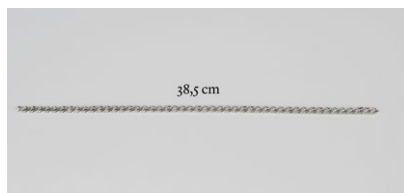

Difficulty: 

## Technique: linking

### Procedure:

#### Step 1

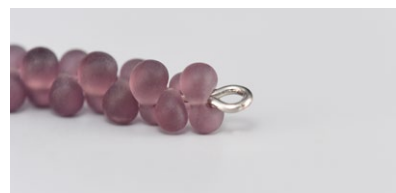

The total length of the necklace is 41 cm.  
The fastening is 2.5 cm (the carabiner and  
the rings). Prepare 38.5 cm of chain.  
This length or a similar one must consist  
of an odd number of links. Open a chain  
link using two pliers with flat jaws.

#### Step 2

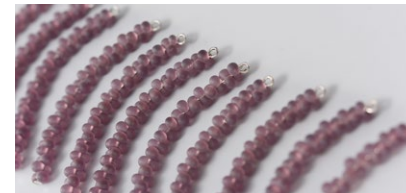

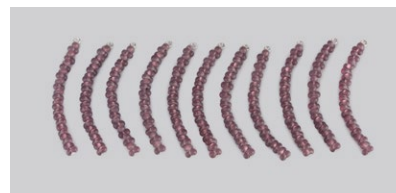

### Linking

Use a 7 cm eye pin. If it is twisted, use  
the flat-nosed pliers to straighten it.  
Then string a line of F1 onto it.  
Leave the last 8-10 mm bare.  
Use that space to create an eye.  
Grip the bare end of the pin between  
the rounded points of the pliers.  
If you're right-handed, hold the eye pin and  
the F1 in your left hand and twist the pliers  
in your right hand. Twist the wire around  
the point. Close the loop. Keep holding  
the point of the pliers in the link.  
Gently twist the link around the edge  
of the F1. Bend the part with the F1 so that  
the link is horizontal with the table.

#### Step 3

Link more F1 pendants onto a 7 cm eye pin,  
a total of 11x.

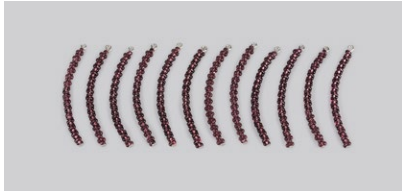

#### Step 4

Hang the F1 pendants on the chain.  
Use two flat-nose pliers to handle the rings  
(there are a lot of rings, so don't let your  
fingers get tired). Find the central link on  
the chain. Use a 6 mm ring to hang one F1  
pendant there. Hang five pendants on one  
side of the chain. Then adorn the second  
side of the chain with the remaining five  
pendants. Place the pendants in every  
second link. You can orient the pendant  
curve to either side; to the left or the right.  
Orient the outer pendants' curves towards  
the centre.

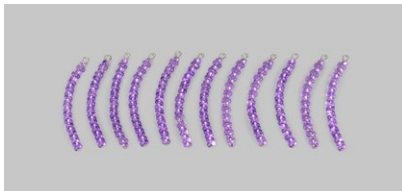

Step 5  
Link **F2** pendants on a 6 cm eye pin; a total of 12x.

Step 6  
Hang the **F2** pendants from the empty chain links using 6 mm rings. You can also orient their curve to either side as you wish. Orient the curves of the outer pendants outwards.

Step 7  
Link **F3** pendants on a 5 cm eye pin; a total of 12x.

Step 8  
Hang the **F3** pendants in the same chain links as the **F2** pendants using 6 mm rings. Orient the pendant arches as you wish. Orient the arches of the outer pendants towards the middle of the necklace.

Step 9  
Attach 2x 6 mm rings to the last chain link on one side. Attach a 5 mm ring to them. Add the carabiner loop before closing the ring.

Step 10  
**Create the earrings**  
Link pendants consisting of 2x **F1** onto a 7 cm pin, 2x **F2** onto a 6 cm pin and 2x **F3** onto a 5 cm pin. Hang one each of the **F1**, **F2** and **F3** pendants onto a 6 mm ring. Use a 4 mm ring to connect the 6 mm ring with an earring hook.
